Aria Series One

Parking Management Platform

Aria Software, built on the CVPS software platform, provides a comprehensive back-office solution for Aria Series One devices delivering a fully-integrated self and valet parking system. Deployed in the cloud, Aria provides web-based controls for intuitive dashboards, user alerts, reporting, and system management. Aria's built-in call center allows you to easily assist customers in the lane with the ability to view device status and transactional details, push rates to payment devices, and vend gates. The Mobile Pay-by-Phone solution allows patrons to use the camera on their phone to pay remotely without downloading any applications.
