## Web-Based Validations

Offer customers discounts with flexible, validated parking through the user-friendly validation app or via our intuitive web-based platform.

CVPS Web-Based Validations make it possible for authorized users to easily apply one or multiple validations to an individual customer's valet ticket. Tickets, electroic or physical, can be scanned or manually entered through the validation app or via a web browser, keeping the process contactless.

### Features

- Web-based or app interface
- The Valet App available for iOS and Android
- Customized validations for multi-tenant/multi-store operations
- Barcode and QR code scan compatible
- Easily set parameters through the CVPS back-office software
- Customizable, permissions-based access
- Contactless operation
