

# aria

DRIVEN BY CVPS

## SERIES ONE

The Aria Series One product line is simple to install, simple to support, feature rich, and low cost. A single Aria Series One device can function as an entry, exit, or credit card pay station for complete flexibility. The devices

are driven by cloud-based CVPS Software for a comprehensive back-office solution. Aria provides intuitive dashboards, user alerts, and system management with a built-in call center and mobile payment solution.

- Mobile Acceptance
